DOLLAR DOLLAR DOLLAR

The primary cost drivers impacting the deficit above include several high dollar mandated costs or programs that often overshadow our success and the outstanding commitment of the entire BASD community including the board, administration, staff, parents and students in the achievements of our school district. The impact of these few areas presents a very difficult challenge in maintaining a fiscally conservative operational approach while still providing exciting, creative and inspiring educational opportunities for our students.

Expenditure Summary by Functional Area

Jan 11, 2016

The Function describes the activities for which a service or material is acquired. The functions of an LEA are classified into five broad areas: 1) Instruction, 2) Support Services, 3) Operation of Non-instructional Services, 4) Facilities Acquisition, Construction and Improvement Services, and 5) Other Financing Uses. Functions consist of activities, which have somewhat the same general operational objectives. For example, the subfunctions (the first major subdivision of a function), of the function Support Services consist of such areas as transportation, pupil personnel services, administration, etc. The function for Instruction is broken down by program (e.g., regular, special, vocational, etc.). Construction of the functional coding structure beyond the subfunction classification is based on the principle that the classification of activities should be combinable, comparable, relatable and mutually exclusive.

Expenditures by Functional Area - Expanded View

Jan 11, 2016

This summarizes the activities for detail area where services are delivered. Functions consist of activities, which have somewhat the same general operational objectives. For example, the subfunctions (the first major subdivision of a function), of the function Support Services consist of such areas as transportation, pupil personnel services, administration, etc. The function for Instruction is broken down by program (e.g., regular, special, vocational, etc.). Construction of the functional coding structure beyond the subfunction classification is based on the principle that the classification of activities should be combinable, comparable, relatable and mutually exclusive. The expenditure and expense accounting system has been so structured that all the costs within the particular subdivisions of that function can be combined to form a summary total of related costs. Costs are recorded only once so that they are mutually exclusive.
